KLEEO

Factsheet - Crisis Simulation
Response is key, but preparedness is a must.

In today's world, any organization might fall victim to a cyber-attack. It is no longer the question IF but WHEN your firm is attacked. Already in 2017, NotPetya has shown the world the impact of an unintentional selection of companies and the harm they faced. Kleeo is your partner to help you prepare your organization's People, Process, and Technology to most effectively respond to cyber-attacks.

What we test
Using our proficiency in orchestrating table-top and simulation exercises coupled with our collaborative methodology, we deliver customized evaluations of our clients' incident response and crisis management capabilities. Through our meticulously crafted exercises, we identify deficiencies in response protocols, ensuring the identification of potential lapses in communication with both customers and regulatory entities following a data breach. Our services are tailored to reveal vulnerabilities, enabling your organization to fortify its preparedness for a sophisticated cyber-attack through effective and corrective response measures.
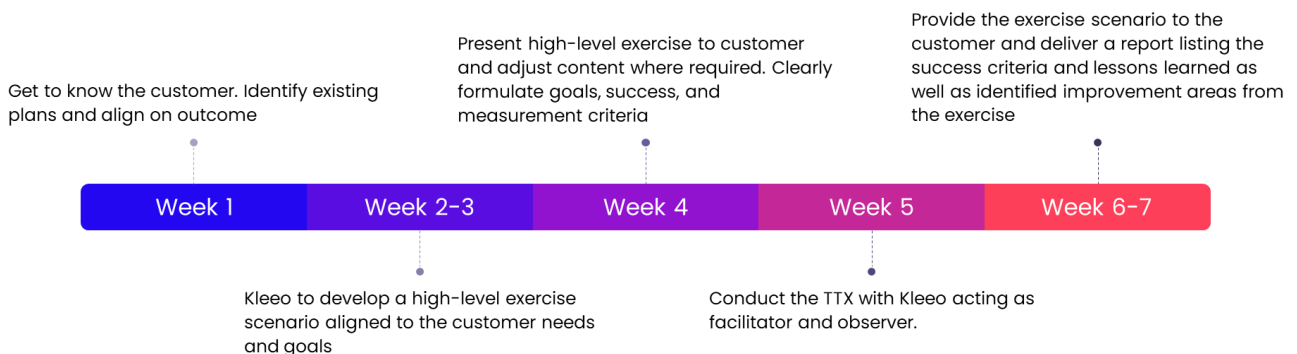

What we offer
Table-top Exercises (TTX) - Ranging from simple walkthrough exercises to multi-hour active role-play between your technical and management teams. New injects unfold the scenario over time to which your teams must respond.
- **Goal**: Bring together technical and management teams to align on common understanding and clarify overall roles and responsibilities.
- **Target audience**: Companies eager to test their maturity in responding to cyber-attacks or those who want to test their response procedures in a safe environment.

Crisis Simulation Exercises (CSX) - Establishing an exercise lasting up to a day to test crisis response to a sophisticated cyber-attack on multiple levels. CSX builds up on lessons learned from previous TTXs.
- **Goal**: Exercising response procedures under pressure for incident response and cross-functional management teams.
- **Target audience**: More mature organizations who might have run some TTX already and would like to bring testing to the next level.

Why Kleeo?
Kleeo's modular Crisis Simulation workshops can help your organization uncover the biggest gaps. We partner with your team, analyze current plans, develop a tailor-made scenario fit for your industry and current maturity, and provide you with tangible improvement actions. We strive for ultimate customer satisfaction, take your desires seriously, and provide a fun environment to improve your cyber security preparedness.

Your benefit
After every workshop, you will receive all slides and artefacts developed during the exercise and its preparation. Findings are shared with you immediately upon exercise completion. A detailed PDF including all key improvement areas and proposed next steps is shared with all participants within two weeks after the simulation. Kleeo is present as the facilitator and observer to your TTX and CSX.

What you can expect from a TTX with Kleeo

Get to know the customer. Identify existing plans and align on outcome

Present high-level exercise to customer and adjust content where required. Clearly formulate goals, success, and measurement criteria

Provide the exercise scenario to the customer and deliver a report listing the success criteria and lessons learned as well as identified improvement areas from the exercise

| Week 1 | Week 2-3 | Week 4 | Week 5 | Week 6-7 |

Kleeo to develop a high-level exercise scenario aligned to the customer needs and goals

Conduct the TTX with Kleeo acting as facilitator and observer.

About Kleeo
At Kleeo, we are committed to making security accessible to all businesses, no matter their size or industry. If you're seeking robust security solutions from Microsoft which are tailored to your specific needs, contact us today to discover how we can help to enhance your cyber security.
